Which markets show interest in learning English?

tr, de, pl, cs, uk · last 12 months vs the same months a year earlier · data through 2026-09-26

Bottom line

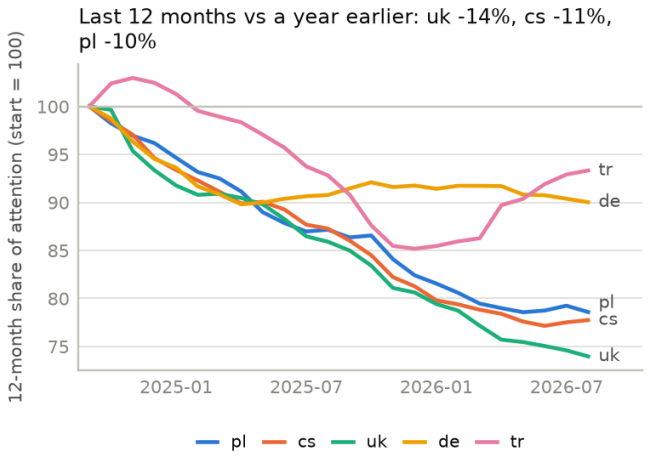

Interest in the English language is stagnant or declining across Eastern European Wikipedias (Polish, Czech, Ukrainian), but stable in German and Turkish. German is the largest audience (23,694 views/month), while Turkish (7,046 views/month) is the only other market showing no clear trend. German should be your next research target, followed by Turkish to validate willingness to pay in a non-Western European market.

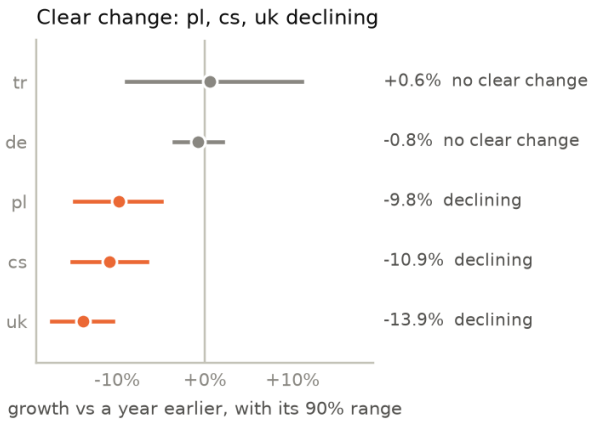

Measured: views of the Wikipedia article on “English” (Q1860) in each edition. It stands in for the question above only as far as that article covers it.

Verdicts by edition

Edition	Article	Views per month	Growth [90% range]	Verdict	Confidence	Segment
tr (Turkish)	İngilizce	7,046	+0.6% [-9.0%, +11.1%]	no clear change	-	large & flat
de (German)	Englische Sprache	23,694	-0.8% [-3.5%, +2.0%]	no clear change	-	large & flat
pl (Polish)	Język angielski	7,913	-9.8% [-14.9%, -5.0%]	declining	high	declining
cs (Czech)	Angličtina	2,947	-10.9% [-15.1%, -6.7%]	declining	high	declining
uk (Ukrainian)	Англійська мова	6,767	-13.9% [-17.5%, -10.5%]	declining	high	declining

tr vs de: 1.4 points apart, no clear difference · tr vs pl: 10.4 points apart, a clear difference · tr vs cs: 11.5 points apart, a clear difference · tr vs uk: 14.5 points apart, a clear difference

What to research next

• Research the German market first**: it has 3× the viewership of Polish, no declining trend, and sits between Western and Eastern Europe geographically. Validate product-market fit and monetization appetite.
• Validate Turkish interest independently**: Wikipedia views are flat, but Turkish learners may engage differently. Survey or interview users; it's a large, growing economy not yet well-studied.
• Revisit Eastern Europe later**: declines may reflect shifting to YouTube or apps, not lost demand. Re-approach once your app gains traction.
• Monitor whether Wikipedia declines track app demand**: page view declines in these markets could signal that learners have moved to more specialized tools. Confirm before deprioritizing.

Assumptions and limitations

• Pageviews measure attention on Wikipedia, not demand or willingness to pay.
• tr: all of tr Wikipedia changed -16.3% year over year; share-of-edition figures remove this effect
• uk: all of uk Wikipedia changed -24.6% year over year; share-of-edition figures remove this effect
• Wikimedia's daily and monthly edition totals differ slightly in 2025-03, 2026-04 (at most 0.29%); figures here use the daily data
