Which audiences should we research next for English language learning?

tr, de, pl, cs, uk · last 12 months vs the same months a year earlier · data through 2026-09-26

Bottom line

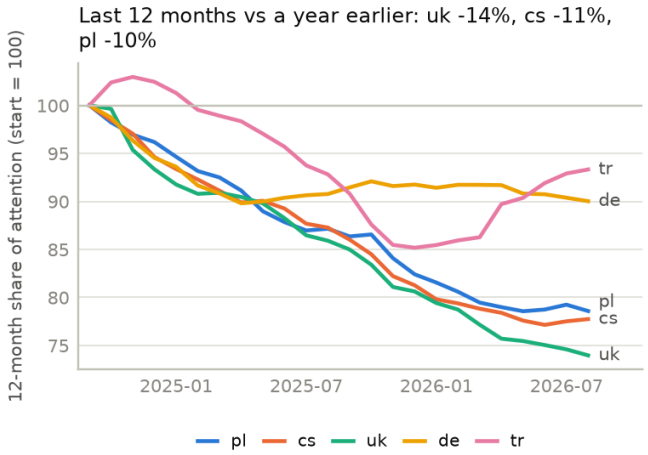

German and Turkish Wikipedia readers show stable interest in English, while Polish, Czech, and Ukrainian readers show clear declining interest. German is the most promising lead: it has the largest audience (23,694 views/month) with no decline, and Turkish offers a second opportunity with 7,046 views/month and similarly flat trajectory. Investigate what's working in those markets while the Eastern European markets shift strategy.

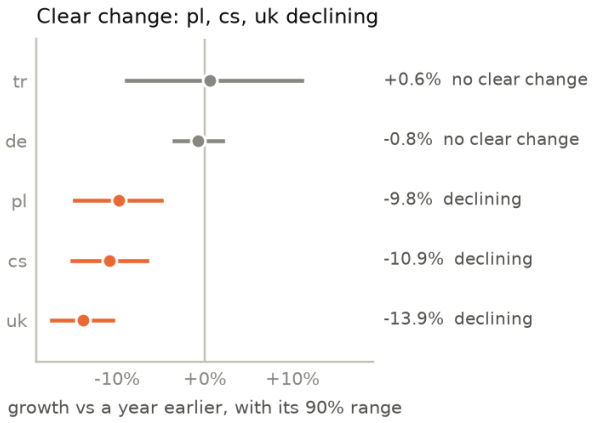

Measured: views of the Wikipedia article on “English” (Q1860) in each edition. It stands in for the question above only as far as that article covers it.

Verdicts by edition

Edition	Article	Views per month	Growth [90% range]	Verdict	Confidence	Segment
tr (Turkish)	İngilizce	7,046	+0.6% [-9.0%, +11.1%]	no clear change	-	large & flat
de (German)	Englische Sprache	23,694	-0.8% [-3.5%, +2.0%]	no clear change	-	large & flat
pl (Polish)	Język angielski	7,913	-9.8% [-14.9%, -5.0%]	declining	high	declining
cs (Czech)	Angličtina	2,947	-10.9% [-15.1%, -6.7%]	declining	high	declining
uk (Ukrainian)	Англійська мова	6,767	-13.9% [-17.5%, -10.5%]	declining	high	declining

tr vs de: 1.4 points apart, no clear difference · tr vs pl: 10.4 points apart, a clear difference · tr vs cs: 11.5 points apart, a clear difference · tr vs uk: 14.5 points apart, a clear difference

What to research next

• German market first**: largest audience (23,694 views/month), stable interest, established market. Validate why German sustains engagement as others decline.
• Turkish opportunity second**: stable 7,046 views/month in untapped market. Test regional positioning and mobile-first strategies.
• Investigate Eastern European decline**: Polish (-9.8%), Czech (-10.9%), Ukrainian (-13.9%) dropping consistently. Diagnose causes—competitors, free alternatives, or shifts in demand.
• Segment Polish engagement**: still 7,913 views/month, so identify which learner segments remain active versus those converting to competitors.

Assumptions and limitations

• Pageviews measure attention on Wikipedia, not demand or willingness to pay.
• tr: all of tr Wikipedia changed -16.3% year over year; share-of-edition figures remove this effect
• uk: all of uk Wikipedia changed -24.6% year over year; share-of-edition figures remove this effect
